

#### Features

- ✓ Input voltage 176~264VAC
- ✓ IP67 Level
- ✓ -40~+70°C working temperature(refer to derating curve)
- ✓ Lightning Protection: Line to Line 2KV,
  Line to Ground 4KV
- ✓ Protections:Short circuit/Over load
- ✓ 2 years warranty
- Application:Outdoor lighting,Architectural lighting,Decorative lighting,Sign light,and Street lights, etc.
- Approvals:

#### Standard:

## Product Description

CYV-200 series is 200W waterproof power supply with IP67 high protection level. The input voltage ranges are from 176 to 264Vac. This series of products are designed for high temperature resistance. The working temperature of full load can reach as high as 50  $^{\circ}$ C. It is specially designed for outdoor lighting, indoor and outdoor lighting, and street lamps. Super high efficiency, compact shell design, good heat dissipation, and all-round protection ensure the long-term stability of this series of products.

	Cooling mode	☑Free air □ Fan				

# Remark

\*In order to prolong the service life, it is recommended to leave 20% more allowance when configuring the load. For example, if the equipment needs 100W power, the power supply should be not less than 120W.

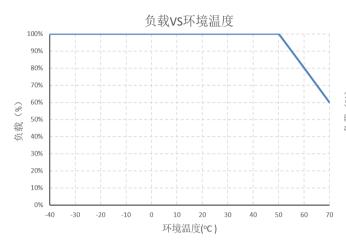

\*The ripple test method of switching power supply: 20 MHz oscilloscope is used to test the output terminal of power supply. The length of ground wire of oscilloscope probe is not more than 12 mm, and 47 uF electrolytic capacitor and 0.1 uF high frequency capacitor are input into the probe.

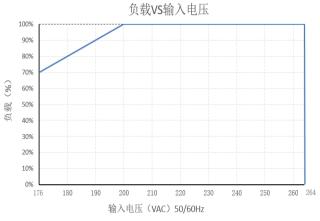

\*All electrical performance tests are performed at 25 C.

### Install drawing

#### • Use instructions:

- 1. please follow the installation instructions when use the power supply of
- 2. Before power on test run after installation, please check and proofread the wiring on each terminal, make sure that the input and output, AC and DC, positive and negative, voltage and current values are correct, prevent the occurrence of wrong connection, and avoid damaging the power supply and user equipment.
- 3. Before power on, please use a multimeter to measure whether the live wire, zero wire and ground wire are short circuited, and whether the output terminal is short circuited; it is better to start without load when power on o
- 4. Do not exceed the nominal value of the power supply when using, so as not to affect the reliability of the product. If you need to change the output parameters of the power supply, please consult our technical department before using.
- 5. In order to ensure the safety of use and reduce interference, please ensure that the grounding terminal is reliably grounded (ground wire please thicker than AWG18#)  $_{\circ}$
- 6. If the power supply fails, please do not repair it without permission. Please contact our customer service department as soon as possible, customer service line: 86-519-85215050.

## Transport storage:

### 1. Transport:

The package is suitable for shipping by automobiles, ships, airs, trains, etc. During transportation, it shall be rain proof,loaded and unloaded gently  $_{\circ}$ 

#### 2. **Storage**:

When the product is not in use, it shall be placed in the packing box. The storage environment temperature and relative humidity shall meet the requirements of the product. No corrosive gas or product in the warehouse, and no strong mechanical vibration, impact and strong magnetic field. The packing box shall be padded at least 20cm above the ground, and not be soaked. If the storage time is too long (more than 1 year), it shall be rechecked by professionals before use.
